

TANGIBLE SOUNDS

CROSS THE LINE (4/5)

littleSUNDAY CD Review

Toronto's Little Sunday brings a great mix of classic and modern rock together with the new EP *Cross The Line* for their follow up to the group's debut album *Day Of Hollow*. With five tracks of pure flashback goodness that will leave any honest rock fan with a finger on the repeat button, *Cross The Line* is definitely one album to check out.

As a 90's music junkie, I really appreciated all aspects of this album quite a bit. The opening track "Leave" starts off with what sounds a lot like a cross between all that is Collective Soul and Led Zeppelin's "The Immigrant Song." High energy and coherent, this is music that is easily on par with any bands you hear on radio today. It's certainly a great first impression speaking as someone who has just been introduced to the band through this album.

The quality continues throughout the album, yet there's not much of a change of pace to speak of. That's not necessarily a completely negative thing, as I really enjoyed every track offered up here. "In The End" is a really stand out tune, and as I stated before, something that you'd assume to hear blasting in a car radio, or in a music store. Lyrically and musically it's all there for someone who can appreciate good tunes.

The band has their lyrics and music well put together, and have some impressive composition that certainly, as I mentioned before, warrants repeat listening. This is especially true if you dig the sounds of the 90's. Honestly, I've missed the sound, and I'm very glad to hear that some bands out there that can appreciate a good thing. Yes, its stuff we've all heard before, but it's good, and frankly that's becoming more and more or a rare thing from what I've noticed. So if those elements are something that have you taking notice, pick up *Cross The Line* as it's sure to impress on a few surprising levels.

Track Listing:

1. Leave
2. Cross The Line
3. In The End
4. Stop The Rain
5. Drained
